## PROJECTS

### Hand gesture security surveillance system

It is a surveillance system which can help to prevent threats of an organization it was used in diffrent organizations to make people safe .it is work by using hand gesture based on hand gestures it recognize the theret and give the information to respective officials.

### vidya4u - Website

vidya4u is the one stop learning webpage for all the content required by an engineering graduate.

### E-Learning-System

In this new era of electronics, we know the concept of e-learning which does not include the use of paper and pen. There are many advantages of e-learning system. In this e-learning system we can assign projects to students and can share documents and more easily. This system has three modules including student, faculties and Admin. Students can login, they have access to main menu, calendar, projects, documentation, to upload, view the things uploaded by the faculties, knowledge books, also send messages to faculties. Faculties can login and have access for viewing, uploading documents and projects. Admin can login and manage the faculties and student details and also view projects. This is how the new concept of e-learning came into existence, which is an easier and smarter system for colleges.

### let's together

It is a private meeting website for students for clarifying there douts .it is work like a zoom and teams but here in this website we dont expect any data from student and data was not store in any where .it is safe and secure.
